Frontend Developer — six years shipping web applications in regulated industries.

WORK HISTORY

Lead Frontend Developer, Barclays (Digital Banking) October 2021 – present

- * Own the frontend for the business-banking onboarding journey (React, TypeScript, Redux Toolkit), used by ~30k new businesses per month.
- * Reduced time-to-interactive on the onboarding app by 45% by splitting bundles, lazy-loading heavy forms and moving data fetching to React Query.
- * Accessibility champion for the squad: all new features ship with axe-core checks in CI and manual screen-reader passes; fixed 140+ WCAG AA issues found in an audit.
- * Testing: Jest + React Testing Library for components, Cypress for end-to-end journeys; coverage raised from 41% to 82%.
- * Pair with and coach three junior developers.

Frontend Developer, Made Tech (government digital services consultancy) September 2020 – September 2021

- * Built accessible, responsive public-sector services with React and TypeScript following the GOV.UK Design System; every service passed GDS accessibility assessment.
- * Wrote shared React components contributed back to a cross-department component library.

Software Developer, Sage July 2019 – August 2020

- * Built UI features for the cloud accounting product in React and SCSS.
- * Set up a GitLab CI pipeline for the frontend with linting, unit tests and preview deployments.

Graduate Developer, Sage September 2018 – June 2019

- * Rotations across QA automation and frontend teams.

EDUCATION

BEng Software Engineering, University of Leeds (2018)
