Software engineer with 7 years of backend experience, now moving into frontend.

EXPERIENCE

Software Engineer (Full-stack, frontend focus) — Bazaar Technologies Apr 2025 – Present

- Moved from the payments backend team to the merchant web app team in April 2025.
- Building new merchant onboarding screens in React and TypeScript.
- Writing component tests with React Testing Library.
- Still maintain the Node.js BFF (backend-for-frontend) that serves the web app.

Senior Backend Engineer — Bazaar Technologies Jan 2022 – Mar 2025

- Designed payment reconciliation services in Node.js (TypeScript) and PostgreSQL processing 2M transactions per day.
- Built GraphQL APIs consumed by the web and mobile apps.
- Set up CI/CD in GitHub Actions for 12 services.

Backend Engineer — Systems Ltd Jul 2019 – Dec 2021

- Java/Spring Boot microservices for a banking client; REST APIs and Kafka consumers.
- Unit and integration testing with JUnit and Testcontainers.
